Subject: Menominee River

Mr. Bryant:

I am contacting you in regards to the proposed Aquila Resources Back Forty Project proposed to be located within 150' of the Menominee River. This site is located 10 miles upriver from Green Bay/Lake Michigan. This will be an open-pit sulfide mine, processing and storing tailings on-site.

The concerns are many in regards to the environment. There is a huge concern for the Lake Sturgeon and the efforts and money that has been put into preserving this pre-historic species. The Menominee River is a huge draw for fishing and recreation. We will be hosting the Cabela's Fishing Tournament in August.

The people of Michigan and Wisconsin do not want this mine and we do not want to put the environment at risk in the advent of a natural disaster such as a tornado or flooding. The mine pit is designed to be located within 150' of the Menominee River and is dangerously near 100-year flood plain.

If you have any advice or input, it would be greatly appreciated. Thank you for your time and consideration.

Best Regards,
